[illegible]

The purpose of this study was to determine the effect of the use of a computerized system on the accuracy of the data collected from the system. The study was conducted in a laboratory setting and involved the use of a computerized system to collect data from a group of subjects. The subjects were asked to perform a task and the data collected from the system was compared to the data collected from a manual system. The results of the study showed that the use of the computerized system resulted in a significant increase in the accuracy of the data collected.
